Subject: 3M™ EMI Absorber AB5000 Series Discontinuation Notice

To Our Valued Customers:

We regret to inform you that 3M™ EMI Absorber AB5000 Series will be discontinued in Europe because the material contains plasticizer DEHP, which is on the authorization list of REACH regulations. This discontinuation is effective immediately and affects the following product numbers:

- 3M™ EMI Absorber AB5010
- 3M™ EMI Absorber AB5020
- 3M™ EMI Absorber AB5030
- 3M™ EMI Absorber AB5050
- 3M™ EMI Absorber AB5100

You are receiving this letter because your company has purchased at least one of the above mentioned products during the last two (2) years. Please circulate this notice to the people in your organization who need to know of this change so they can follow up as necessary with either 3M or your customers.

3M recommends 3M™ EMI Absorber AB5000SHF Series as a possible alternative solution. Keep in mind that the recommended alternative series does not have the same specifications as the one being discontinued, so testing should be conducted to ensure it will meet your application needs.

If you have any questions or require samples for testing, please contact your local 3M representative.

Thank you for your understanding and continued partnership with 3M.

Sincerely,

**JH Jeen**  
Global Business Manager  
3M Electronics Materials Solutions Division
